SOUTHWEST CAFS SYMPOSIUM

The symposium was designed in response to Fire Departments seeking information and answers to questions regarding the operation of Compressed Air Foam Systems. The use of CAFS by the fire service has had exploded growth over the last five years. Unfortunately standards and firefighting training techniques with CAFS has not been as fast. Currently CAFS training today is still basic, full of questions, and misinformation. This symposium will furnish information to improve CAFS safety, understanding, and performance for Fire Departments wanting to improve their firefighting capabilities.

PROGRAM WORKSHOP TOPICS:

- *CAFS, How it works and why?
 - *Actual CAFS field fire tests
 - *Getting your firefighters to buy into CAFS
 - *Purchasing CAFS units, Performance specifications
 - *Retrofitting of existing apparatus with CAF Systems
 - *Maintenance and testing of CAF Systems
 - *Operation of CAFS Pumpers, Aerials, and Wildland vehicles
 - *Firefighting with CAFS in structure and wildland applications
 - *Training your department on how to use CAFS
 - *Class A Foam concentrates what works, testing, ratings
 - *CAFS equipment, nozzle selection, application rates
 - *Actual CAFS fire testing / demonstrations
-

- *Apparatus and CAFS manufacturers will display the latest hardware and equipment available today.
 - *Networking and interaction with these manufacturers and other Fire Service Professionals will assist with your future CAFS requirements.
-
